

zeb//control profit Adapter Certified by Avaloq

Avaloq works with highly qualified software partners who provide third-party systems in order to complement the functionality within the Avaloq Banking System. The close partnership ensures the release capability of the integration.

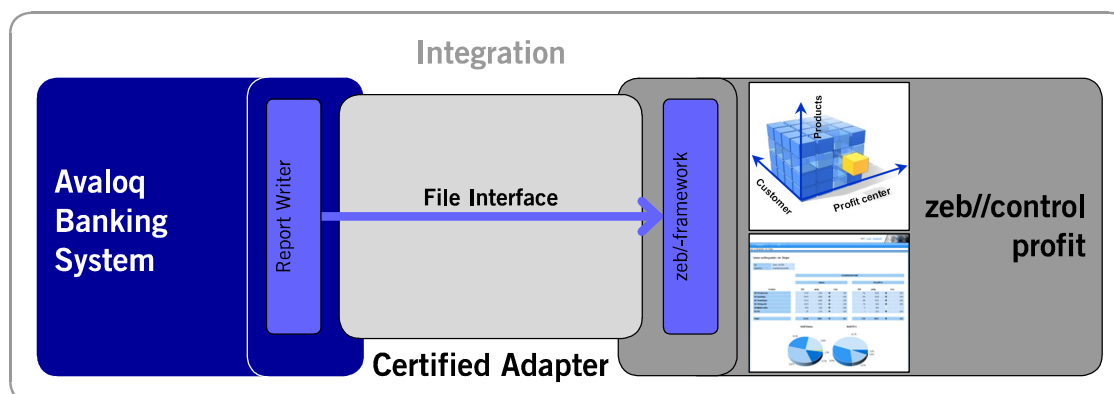

Third-party System: zeb//control profit

zeb//control profit is the most powerful and precise management instrument for a targeted profitability management and substantiated budget control. zeb//control profit proves to be efficient in daily applications in a multitude of innovative nationally and internationally operating banks.

Functional Highlights of the Certified Adapter

- Supplies all Avaloq data for an integrated management information system
- Standardised, configurable framework for extraction and transformation of Avaloq data which contains a set-up with business content based on the Avaloq Model Bank
- Streamlined implementation time for zeb//control profit due to a comprehensive adapter between the Avaloq Banking System and zeb//control profit
- Decoupling of Avaloq release changes because of using a downstream zeb/-framework and Avaloq Report Writer concept
- Possible expansion of the certified adapter for different information requirements like risk management, accounting, legal reporting (data transformation for any target models and different information requirements)
- Transparent and customisable result presentation
- Extensive and practically proven standard reporting combined with drill-down functions (down to individual clients/accounts/transactions)
- Integrated top-down/bottom-up planning, comparison of target and actual business results
- Ex ante and ex post calculation of all contribution margin levels
- Adapter is fully maintained by zeb/

Integrated Architecture

Certified Adapter
zeb//control profit
for the Avaloq
Banking System

Restrictions

The parameterisation effort depends on the extent of your alignment with the Avaloq Model Bank.

Avaloq – essential for banking

Avaloq is the Swiss market leader for standardised banking software with locations in Switzerland, Luxembourg and Singapore. Over 35 banks worldwide rely on the Avaloq Banking System, which is systematically orientated towards the business processes and requirements of an innovative bank. Whether for a private, retail or universal bank: using Avaloq, bankers are able to boost efficiency and increase transparency. Avaloq is much more than a banking system. The Avaloq Academy ensures that all project team members have been properly trained, so that they are able to make the best use of the Avaloq Banking System's potential. In the Avaloq Community more than 55,000 Avaloq users, customers and partners are able to exchange views on the Avaloq Banking System.
